DIAGRAM SELECTION. The extent of proposed diagram coverage is shown on the index. Available diagrams have the latest approval date under the UTM designation. Each diagram is designated by a number and may also carry the name of a city, town or prominent natural feature within it. Diagrams should be ordered by number, name if shown, and date of approval.

The Supplemental Official Block Diagram represents graphically a line or lines being projected offshore from the baseline and intersecting a particular leasing block. A separate diagram is prepared for each three miles from the Submerged Lands Act Boundary of any state for 8(g) royalty purposes. These diagrams also contain all X and Y intersection values, contributing baseline points and areas.
